

SPEAKER

CHAIM BLACK

CYBERSECURITY ENGINEER

Chaim Black is a cybersecurity engineer at Intrust with over eight years of experience delivering comprehensive security and IT services across diverse industries. As a technical lead on the security team, he specializes in threat detection, incident response and proactive mitigations informed by continuous research into emerging cyber threats. Chaim is passionate about cybersecurity awareness and regularly shares insights at industry conferences, including the Ohio Information Security Conference. He also designs custom automation tools to improve detection, investigation and response workflows, boosting operational efficiency for clients.

Chaim's expertise spans endpoint and network security, vulnerability assessments, compliance and Microsoft 365 security administration. He holds multiple certifications including CompTIA CySA+, Security+, Network+ and Microsoft 365 identity and mobility credentials. His practical experience, combined with his focus on automation and proactive defense, makes him a trusted voice in modern cybersecurity.
